Subject: DA2020/0502 34 Bardo Road and 36 Bardo Road Newport

Attention: Carly Sawyer

Dear Carly

This DA application brings to Bardo Road an over development of the site which is not only not in keeping with other individual residential buildings but also a dramatic up-scaling of the over 55 developments already in Bardo Road. The development is not sympathetic to the street scape with its overall bulk and scale, comprising the visual amenity of the street.

Bardo Road is also at capacity with regard to road traffic. It is already dangerous navigating between parked cars and entering and exiting driveways. We simply do not need additional cars using Bardo Road especially as a long established kindergarten is directly located opposite the proposed development.

The steps taken by the applicant to clear the land prior to development has had a detrimental impact on the environment and has detracted from the leafy nature of Bardo Road. A large component of the tree canopy has disappeared affecting the wildlife of the immediate area.

I believe that the Council and the NBLPP should seriously consider the wishes of the residents of Bardo Road and reject this development as they are the people who will be directly effected.

Regards

Sally Fox

1/30-32 Bardo Road

Newport
