Hi council,

We need a sustainable solution, which should be sand building vs a wall.

The wall should be stopped and focus must be on a long term, sand building solution.

Food for thought, a ramble:

Whilst I certainly do have empathy and concern for those who have houses down on the beach, at the same time they have taken a risk in doing so. (We bought on a hill, purely to be risk averse.):

- Longy to Nth Narra is a sand spit. Naturally it moves, changes, grows and vanishes, depending on what the weather brings. Some might say building in such an area is a great risk. It certainly is no surprise that houses are copping it from the mighty Pacific Ocean. This is only going to get worse over time, due to sea level rise.

Solution: build sand, listen to the experts and save the beachfront.

Many thanks,
Doug Laird

Manly Vale.
