RE: DA2021/1164 - 521 Barrenjoey Road BILGOLA BEACH NSW 2107

I have concerns about both the flora and fauna in this area. The bends are unique to this area and I feel like any more development here would impact already pressured wildlife. It has likely been protected up until now because it is difficult to build and develop. We should keep it the way it is so that the wildlife has somewhere to stay. Where will they go if we slowly push them out of this bush? There is no where else. Please protect the bends... this is so important to our wildlife community. Thanks for listening. Susie.
