RE: DA2021/1612 - 1 Clarke Street NARRABEEN NSW 2101

This seawall is a cost to the entire community to save a few homes. I am totally against Council funding it. We've known in this district since the 1940s when massive ocean floods knocked down houses in Collaroy that this part of the coast was fragile. And yet Council at the time allowed people to build. The huge seas of the 1970s were another warning. Home owners have had decades to do something at their own expense. They continue to buy in the area. Then there's a storm and we're all expected to pay for their repairs.

This wall is environmentally of debatable benefit anyway, and I object to rate payers from outside that beach area paying for it.
