RE: Mod2016/0293 - 80 Evans Street FRESHWATER NSW 2096

Dear Officer, as a resident (across the road) I strongly object to the extension of hours. The original consent was approved on the hours currently now in place, which I might add are not been adhered to. On Tuesday 22/11/16 I called up council that Ganellan were continuing to hammer after 5.00pm with the Excavator . No ranger arrived as promised so I went and saw Peter (Project Manager for Ganellan) who stopped it immediately. Adding to this Dust suppression is not happening, On a project of this size and the location to residential buildings they should be using diesel powered spray machines, I know this as I work for a tier one builder (not a second tier like Ganellan) and a worker with a hose or sprinkler does not cut it, you only have to inspect the state of our buildings, cars and not to mention our washing. The Trucks are not adhering to the speed restrictions or the restriction of using their air brakes. A couple of weeks ago , on the weekend I notice raw sewerage was all over the footpath, no one from Ganellan were around as it was a Sunday so I reported it to the manager (ROB) of the Harbord Diggers who came out with me to inspect and was quick to arrange a clean up and repair. Finally I have had to speak to Ganellan supervisors that after hours the tower crane wind warning alarm should be turned off, several times the crane operator has left for the day and left it on . As I said I am a site manager for a tier one company and I know very well the difficulties on a construction site and understand the benefits to both Ganellan and residents to complete this project sooner than later by allowing them to extend their hours but due to the fact that Ganellan are not complying 100 percent with the original DA conditions and our quality of living has suffered as a result with the hours they are working now and their poor management , I fear our standard of living will further decline. This being said I strongly appose this development extension of hours.
