Further to our earlier submission this development exceeds the height limit that was permitted for earlier developments & also required to set back building to widen the lane number 291/293 doesn't do this. We are concerned about this development having access to garages from the rear lane. ... this limit our access to our garages because there is not enough parking spaces on site which means cars are parked illegally along the lane. Thanking you & hope you take these objections into consideration.
