1.0 Introduction

This report has been prepared to accompany a retrospective Development Application to accompany a small bus depot ('depot') operation on a site in Tepko Road at Terrey Hills (Figure 1).

The purpose of this report is to:

- describe the site, the existing context and the proposed development scheme
- describe the road network serving the site and the prevailing traffic conditions
- describe the available public transport services
- ✤ assess the potential traffic implications
- assess the suitability of the envisaged vehicle access, internal circulation and servicing arrangements

2.0 Proposed Development

2.1 Site, Context and Existing Circumstances

The site (Figure 2) being Lot 14 in DP 255912 occupies a generally rectangular shaped area of some 1,191m² having frontage to the eastern side of Tepko Road. A 'looped' Right of Way (RoW) which extends along the site's southern boundary provides vehicular access for the the site as well as the neighbouring properties.

The site is surrounded by similar nature industrial commercial uses while further afield are residential pockets comprising largely single residences.

It is understood that the depot has been occupied for use by charter bus company 'On Course Tours and Travel' since its inception in 2008 and now offers a small fleet of 10 buses accommodating local and interstate travel by individuals and groups.

Local trips typically involve providing bus services for various Probus groups, local sporting clubs and teams, local retirement villages including trips to local shopping centres and excursions, School trips and excursions etc. Regional and interstate trips for extended time periods and involve bus-based travel packages for both groups and individuals. A schedule of months and destinations are reproduced in Appendix D.

On Course Tours and Travel also offers:

- a day tour 'club' offering day bus trips tours for individuals and groups within the community
- an extended tours program involving trips further afield (e.g. Western Australia) for up to 6 weeks duration. In these instances, vehicles are away from the depot for 1, 2 or up to 6 weeks at a time.

The bus fleet comprises 10 buses of varius sizes and capacities.

2.2 Proposed Development

It is proposed to formalise the use of the site to accommodate the existing operations. There will be no physical works involved except provision of appropriate line marking to indicate the location of car parking spaces and numbering of bus bays.

The operation will provide formalised and onsite parking for up to 6 cars and 10 bus bays of various sizes and lengths.

Vehicle access for the site will remain as existing, i.e. via the RoW.

Details of the development are provided on the plans prepared by Walsh² Architects which accompany the Application and are reproduced in part in Appendix A.

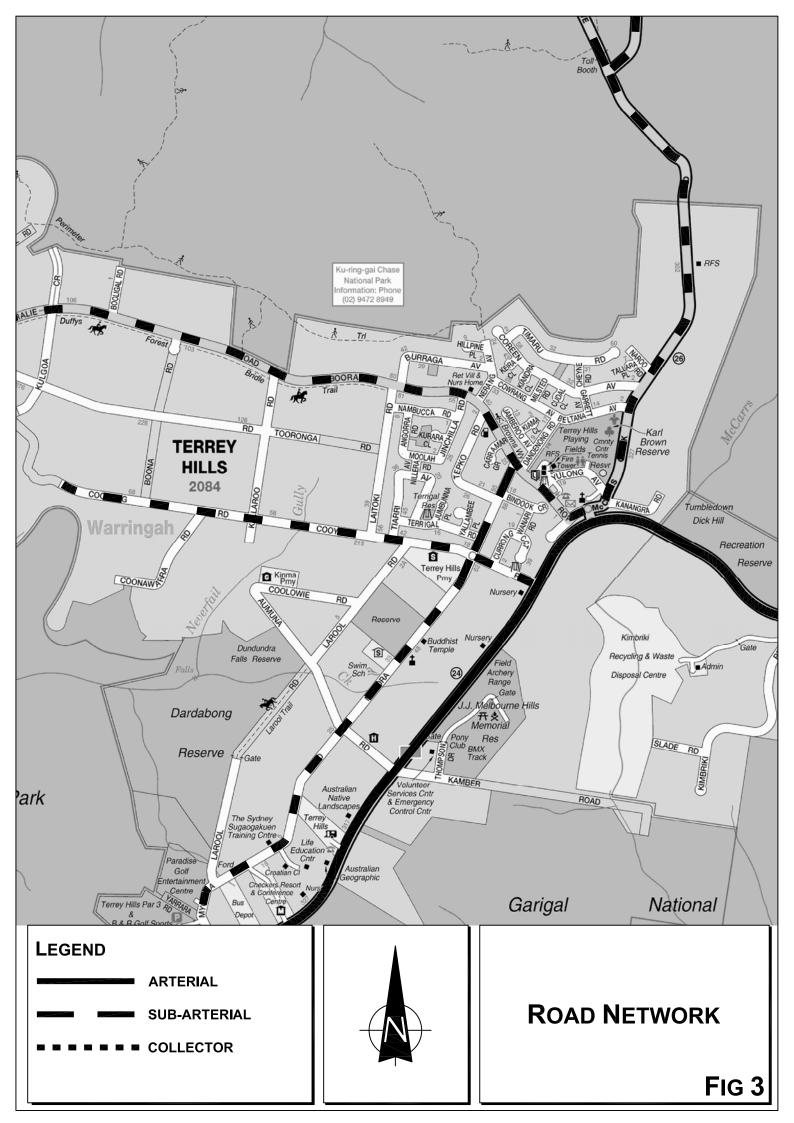

3.0 Road Network and Traffic Conditions

3.1 Road Network

The existing road network serving the site (Figure 3) comprises:

- Mona Vale Road a State Road and arterial route connecting between Pacific Highway at Gordon and Pittwater Road at Mona Vale
- Forest Way a State Road and arterial route connecting between Mona Vale
 Road and Warringah Road
- McCarrs Creek Road a State Road and major collector route linking between Terrey Hills and Church Point
- Booralie Road a collector road providing access to Terrey Hills and Duffys Forest
- Myoora Road a collector road connecting between Mona Vale Road at Forest
 Way and Booralie Road
- Cooyong Road a minor collector road which runs to the west of Mona Vale
 Road
- Tepko Road a local access road connecting between Booralie Road and Myora Road

Tepko Road has a carriageway width of some 12.5m and carries one traffic lane and one parking lane in each direction in the vicinity of the site.

3.2 Traffic Controls

The existing traffic controls which have been applied to the roads in the vicinity of the site (Figure 4) include:

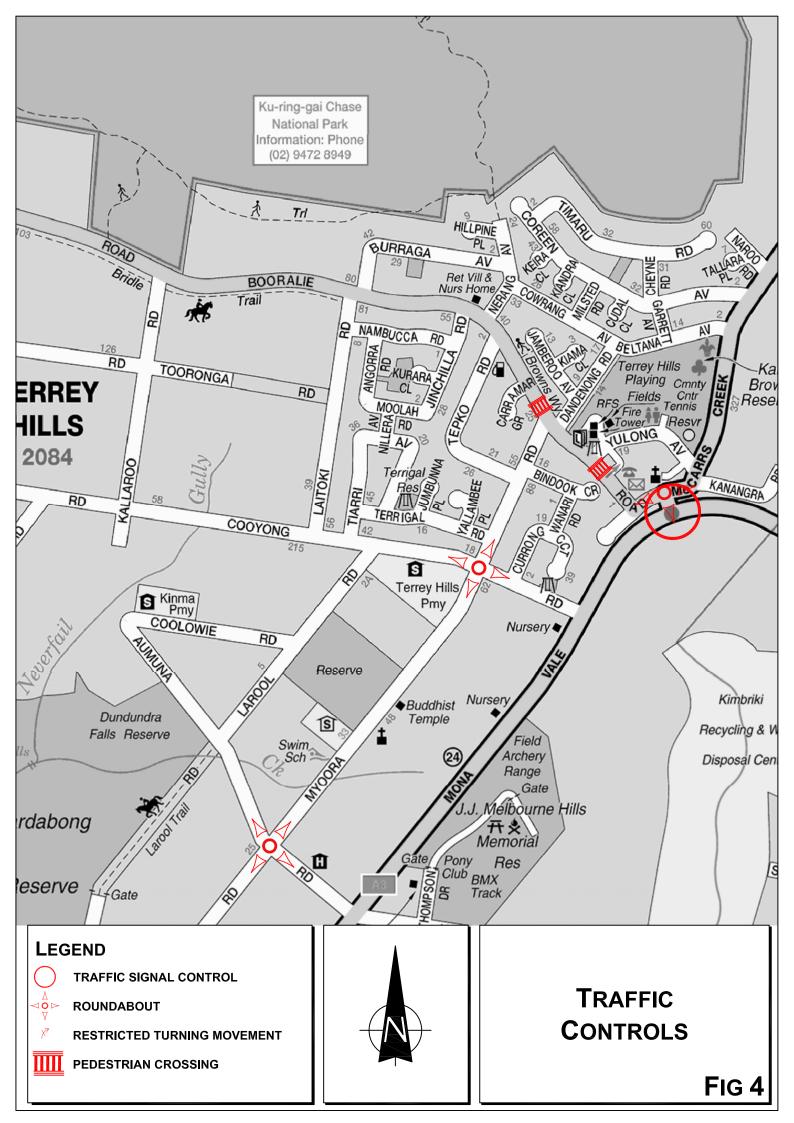

- traffic signals at the Mona Vale Road, Forest Way and Myoora Road intersection which incorporate the prohibition of the right-turn movement from Mona Vale Road to Myoora Road
- * the traffic signals at the Mona Vale Road and McCarrs Creek Road intersection
- the roundabout at the Booralie Road and McCarrs Creek Road intersection
- the roundabout at the Myoora Road and Cooyong Road intersection
- the bus stops on both sides of Myoora Road to the north and south of Cooyong Road
- the marked pedestrian crossings on Cooyong Road and Myoora Road near the intersections of those roads
- the 50kmph speed restriction on Myoora Road, Cooyong Road and Tepko Road with 40 kph school speed zone near the Primary School frontage

3.3 Traffic Conditions

An indication of the existing traffic conditions in the vicinity of the site is provided by data published by the RMS and site observation undertaken as part of this assessment. The data published by the RMS is expressed in terms of Annual Average Daily Traffic (AADT) and the most recently available data is summarised in the following:

Location	AADT
Mona Vale Road west of Forest Way	32,812

Traffic movements on Tepko Road were observed to be relatively minor during the AM and PM peak periods and because there were ample gaps in the traffic flows, vehicle access to/from driveways could occur with no undue difficulty.

3.4 Transport Services

There is a total of 7 bus routes servicing the vicinity of the site as follows:

Service	Destinations	Frequency
Route 196	Mona Vale to Gordon	20 min & 60 min
Route 197	Mona Vale to Macquarie University	30 min & 60 min
Route 260	Terrey Hills to North Sydney	20 min AM & PM
Route 270	Terrey Hills to City	30 min
Route L70	Terrey Hills to City	20 min AM
Route 271	Terrey Hills to City	30 min early & late
Route 284	Duffy Forest to Chatswood	2 AM & PM

The frequency of these routes varies; however, they appear to have been arranged to provide a relatively continuous arrival and departure (e.g. 271 is for the early morning and late evening periods only). The nearest bus stops are located within 300m of the site.

The relevant bus route maps are provided in Appendix B.

4.0 Parking

The Northern Beaches Council DCP does not contain a parking criterion for depot and indicates to rely on surveys of similar developments. The DCP specifies a requirement of 1 space per 40m² GFA for offices.

As the ancillary office space is approximately 83m², the application of the DCP criterion for offices would indicate a requirement of 2 spaces.

There are very limited similar nature businesses in Sydney which could provide reasonable correlation in terms of locality and travel behaviour. On a first principle basis, the following are applicable to the existing and proposed operation:

- The depot will accommodate 10 buses (maximum); and
- Each bus will require 1 driver.

If it is conservatively assumed that each bus driver uses his/her own vehicle to go to work, then the peak onsite parking demand would be 10 spaces.

As each driver arrives onsite, he/she would proceed to drive the allocated bus away from the site. Once the bus is vacated from its designated space, its driver's car could be parked on that space until his/her return from duty. Based on this operating principle, each of the bus bay could, therefore, accommodate its drivers' personal vehicles.

On this basis, the following operational demand is applicable to the site:

Total	12 spaces
Drivers	10 spaces
Onsite support/admin staff	2 spaces

While the following parking will be available onsite:

Total	16 spaces
Spare overflow parking	4 spaces
Bus and driver parking	10 spaces
Onsite support/admin staff parking	2 spaces

The provision of 4 additional parking spaces are to accommodate:

- the infrequent events where bus drivers require to attend short briefings by the administrative staff members in the office prior to departures or following arrivals.
- the temporary occupation of these spaces as support staff assists drivers manoeuvre their allocated buses out of the bus bays.
- the infrequent parking needs of service personnel.

The proposed access and parking arrangement/strategy, which is proposed by TTPA in conjunction with the On Course Tours operator, is also detailed in a separately documented Operational Plan of Management (OPM) which accompanies this Development Application.

Subject to the operator adhering to the principles set out in the OPM, it is assessed that the proposed parking arrangement/strategy will be suitable and appropriate to the needs of the business operation.

5.0 Traffic

Similarly, the RMS Development Guidelines do not contain a comparable land use that could be used to project the proposal's peak traffic generation outcome. By virtue of the its relatively minor operation, the proposal is not comparable to a typical depot e.g. the STA depot at Brookvale or the Forest Coach Lines depot at Terrey Hills. Particularly, it does not follow a daily timetable, rather, its typically extended tours (which range between 1 and 6 weeks) often require its fleet to be away from the depot for extended period at a time. As such, the site experiences a significantly lower level of traffic movements when compared to a typical bus depot.

As the business has operated on the site for some years, the established peak periods traffic generation could be identified onsite with no undue difficulty.

It is also advised that there are quite minimal traffic movements during the AM and PM peak periods because the scheduled buses typically depart from the site very early in the morning and return in the evenings. During the site inspection, the following site traffic movements were recorded:

AM Peak (7.30-8.30am)	2 vehicle movements (in)
PM Peak (5.00-6.00pm)	0 vehicle movements

As the proposal is to retain its existing operation, it is apparent that there will not be any perceptible changes to the existing traffic generation outcome.

6.0 Access, Internal Circulation and Servicing

6.1 Access

The existing driveway at the RoW, which has operated with no undue issue, will be retained for use by the proposal.

6.2 Internal Circulation

The proposal will involve the provision of 6 line marked parking spaces onsite to formalise the parking locations. The geometry of these spaces will have regard for the design requirements of AS2890.1.

6.3 Servicing

Deliveries and refuse removal will occur via the RoW as is currently the case. Service personnel and small delivery vehicles will also be able to utilise the car spaces.

Details of the bus turning manoeuvres and arrangements are provided in the vehicle swept path analyses which are provided in Appendix C.

7.0 Conclusion

The proposed 'Bus Depot' at 11 Tepko Road, Terrey Hills will continue to support the local employment needs and serve an existing hospitality market that has been established for some years.

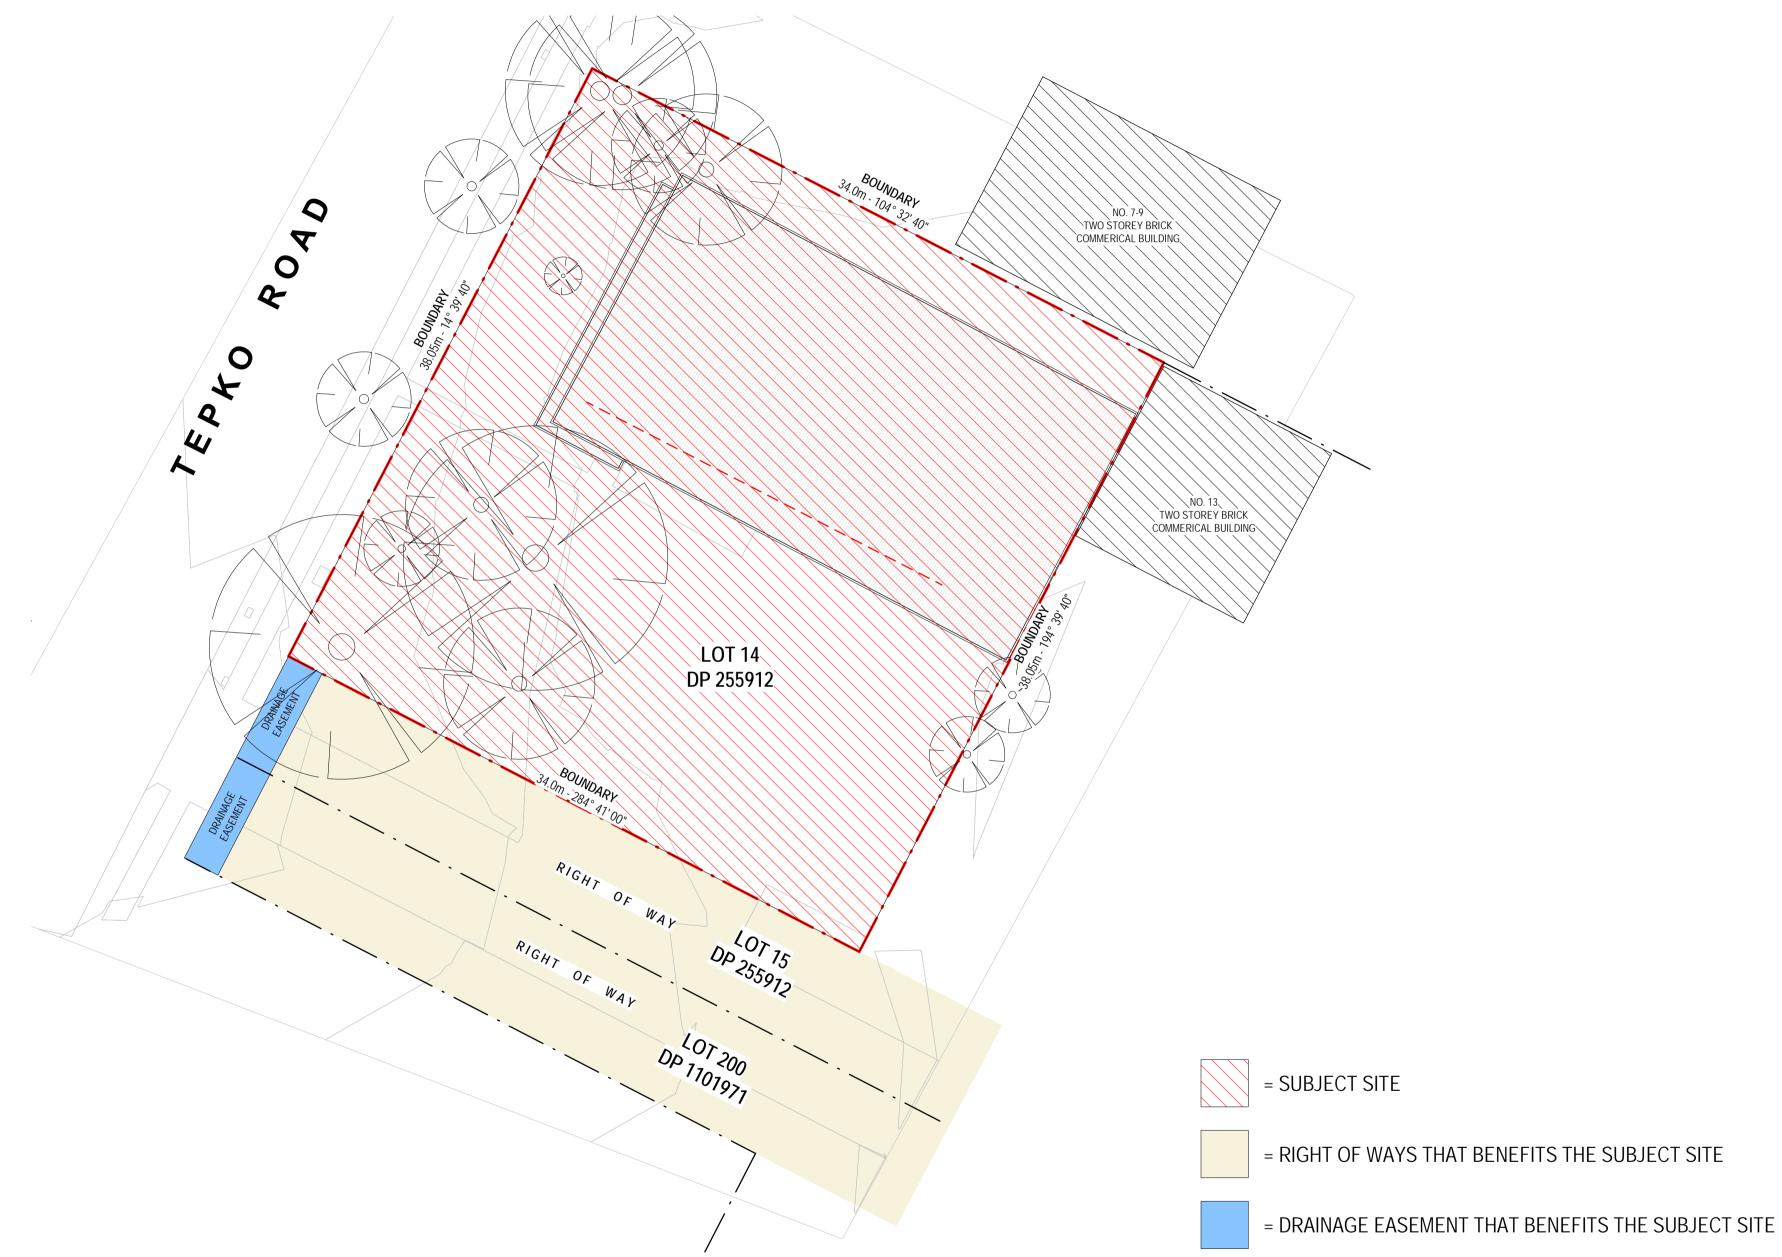

The assessment of the traffic and transport implications of the proposed operation has established the following:

- there will be no adverse or unsatisfactory traffic implications.
- the transport and parking needs of all staff will be adequately accommodated onsite.
- the existing vehicle access, proposed internal circulation, parking and servicing provisions will be quite suitable and consistent with the design principles of AS2890.1.

Schedule of Tours

Oncourse ***

2020 EXTENDED TOURS PROGRAMME

We are again very excited about the coming year's Tour Programme and looking forward to sharing some fabulous destinations with you. In 2020 there are lots of new inclusions along with many perenial favourites. 2019 has been another record year for "Our Family" business, taking more people to more destinations than ever before. Importantly our tours to regional Australia have made a valuable contribution to many towns suffering the ravages of one of the worst droughts in memory and 2020 will see us continue this support.

Apart from some great destinations we believe the journey is of equal importance and every effort is made to ensure your time with us is truly memorable. We have assembled not just a great range of tours but also an outstanding team, with exceptional knowledge and experience, dedicated to your enjoyment. *John and Kerry Dunne*

ON COURSE OVERSEAS TOURS & COllette

This year we are excited to offer a great range of overseas tours in conjunction with Collette who are celebrating 100 years of travel. With the Australian dollar struggling, it is more important than ever to seek out quality tours that represent exceptional value. We will escort the 6 tours listed below (subject to minimum numbers) with airfare included and all of them can be combined with other tour options to extend your holiday. Substantial discounts apply when combining tours! Please call our office to discuss what we can do to make your overseas journeys unforgettable as well as sourcing great early bird and last minute specials.
