**RE: DA2019/1340 - 100 / 0 Meatworks Avenue OXFORD FALLS NSW 2100**

I am concerned about the traffic on this road

The roads in the area are very congested with traffic avoiding the new hospital intersection

The trucks visiting this site already speed down the road and they do not seem to slow down for the school.

The street is narrow with no gutters on one side so trucks passing each other can be very close.

There are no safe footpaths and crossings in the area for the school Children's safety with the increased traffic

I am concerned the new building will not fit in with the beautiful Bush environment and that the increase traffic and parking issues will affect the already congested traffic flow
