**RE: DA2020/1233 - 68 - 90 Evans Street FRESHWATER NSW 2096**

Please please reject in full this submission I am very upset and stressed, the noise of building works for over two years, the overall size and shape does not fit in with the surrounding gardens.

To have rsl club members take over and do what they like , get drunk, shout ,swear and cause upset to our residents is making us stressed and angry also we are concerned about our safety throwing things at us swearing and abuse. Security does nothing anyone can get in and wander around doing what they like. We were told this place would be secure it's not gates are open and people can just step in . We have literally been living on a building site since June 2018 and now more noise it is intolerable making it a living nightmare.

The noise from the club can be heard now without letting them on our bowling green it's a recipe for disaster trouble fighting noise and abuse please do not allow this to happen this was supposed to be a quiet place to live not a free for all on our green area .

Thank you
