RE: DA2021/2065 - 0 Market Lane MANLY NSW 2095

Hi there

This DA appears to infer that there will be bins for the storage of waste - and let's assume that waste will be empty alcohol vessels, food scraps and cigarettes - under the roof of the library and replacing the existing dry bike storage area.

I object to this placement of the bins. I'm a regular customer of a business near this proposed storage area and no-one wants to be eating and drinking this close to bins and the attendant smells, esp stale alcohol and rotting food, and vermin (we've all seen rats in Market Lane).

Further, this is a dry storage area for bikes and it should be retained for that purpose. Additionally, in days with inclement weather the area is a dry space to take refuge from the rain with a hot drink.

The applicants of the DA should find space for waste disposal within the existing confines of the pop-up bar. If rubbish is something they don't want close to patrons, then they'd understand why patrons of other businesses feel the same way.
