Attn Carly Sawyer

Hi Carly,

A water supply work approval is not required, however if any dewatering is required the proponent will need to consult WaterNSW before proceeding.

regards

**Richard Meares**

Water Regulation Officer  
Coastal (Parramatta)

**Important: As a result of NSW water reforms, many functions previously provided by DPI Water have transferred to WaterNSW, effective 1 July. These functions include customer interactions for licencing, compliance and billing – as well as all in-field services and metering operations. Customers will experience streamlined, more convenient and efficient services. Over the coming months, you will begin to see WaterNSW branded materials for these services.**

Please note my new address and phone number.
