RE: DA2020/0393 - 28 Lockwood Avenue BELROSE NSW 2085

I would like to strongly oppose this development. It is far too big and too high for the location. With 2 kids walking to schools within the vicinity of proposed development I am extremely concerned for the health, welfare and well being of not only my children but all children and elderly in the area. Not only during the construction phase but afterwards with the severely increased number of residences and lack of parking there will be an extremely increased number of cars on the road. Being so close to a development as Glenrose I feel all the extra cars from this proposed site will take to parking in the shopping centre parking and make it even harder for current locals to park to do weekly necessary shopping. A development of this size in this area goes against the reason for the area being known as the Forest area, there is no room for high buildings here. I feel that this type of development could have significant safety concerns for all in the area.
