

Tree No.	Plant Name (Species/Common Name)	Age	Tree Height (m)	Average Canopy spread (m)	DBH (m)	DGL (m)	Crown Class	Vigour	Condition	Useful Life Expectancy	Landscape Significance	Tree Retention Value	Observations/ comments	Tree Protection Zone (TPZ) radius in metres	Structural Root Zone (SRZ) radius in metres	Proposed for removal or retention?	Impact / Incursion
1	<i>Angophora costata</i> (Sydney Red Gum)	mature	10.0	18.0	0.79	0.82	dominant	normal	good	long (40yrs+)	high	high	Locally occurring species indicative of original vegetation to the area - therefore ecological significance. Persistent deadwood, smaller rubbing branches. Growing on top of large sandstone rock floater.	9.5	3.0	retain	Existing encroachment in TPZ is approx. 11%. Recommend new dwelling does not extend further into the TPZ of the tree.
2	<i>Ficus benjamina</i> (Weeping Fig)	mature	8.0	8.0	multiple trunks	multiple trunks	suppressed	normal	fair	long (40yrs+)	very low	low	Listed on Council's Exempt Tree Species List, plus tree is located within 2m of existing dwelling. Suppressed canopy by adjacent Sydney Red Gum.	est. 4.8	est. 2.5	remove (exempt)	New driveway and building works will necessitate removal of tree.
3	<i>Angophora costata</i> (Sydney Red Gum)	mature	10.0	20.0	0.44 0.47 0.75	0.92	dominant	low	fair	long (40yrs+)	high	high	Locally occurring species indicative of original vegetation to the area - therefore ecological significance. Three main trunks. Surface woody roots visible below canopy of tree. Base of tree abuts driveway. Small cavity at root buttress. Deadwood evident.	15.0	3.2	remove	New driveway works located in SRZ and TPZ of tree - excavation for new driveway will impact root system of tree.
4	<i>Angophora costata</i> (Sydney Red Gum)	mature	6.0	7.0 (canopy bias to E)	0.24 0.34	0.35	suppressed	low	poor	medium (15-40yrs)	high	moderate	Locally occurring species indicative of original vegetation to the area - therefore ecological significance. Limited live crown density due to suppression.	5.0	2.1	retain	
5	<i>Schefflera actinophylla</i> * (Umbrella tree)	mature	5.0	4.0	multiple trunks	multiple trunks	suppressed	normal	fair	medium (15-40yrs)	very low	low	Located on council land adjacent to front boundary line. Listed on Council's Exempt Tree Species List.	est. 2.6	est. 1.8	retain	
6	<i>Glochidion ferdinandi</i> (Cheese tree)	mature	5.5	4.0	0.15 2 x 0.10	multiple trunks	suppressed	normal	fair	long (40yrs+)	high	moderate	Locally occurring species indicative of original vegetation to the area - therefore ecological significance. Located immediately adjacent to front boundary line.	est. 2.5	est. 1.8	remove	Driveway works located in TPZ of tree.
7	<i>Michelia figo</i> * (Port Wine Magnolia)	mature	3.0	3.0	multiple trunks	multiple trunks	suppressed	low	poor	short (5-15yrs)	very low	very low	Located on neighbouring property to west at No. 66 Powderworks Rd. Tree has been lopped to 3m high - less than the prescribed height and therefore exempt.	est. 1.8	est. 1.3	retain	Proposed works located outside TPZ of tree.
8	<i>Pittosporum undulatum</i> (Sweet Pittosporum)	mature	3.0	4.0	multiple trunks	multiple trunks	suppressed	low	poor	short (5-15yrs)	very low	very low	Tree is less than the prescribed height and therefore is exempt. Tree has been lopped.	est. 2.5	est. 1.5	remove (exempt)	New driveway works will necessitate removal of tree.
9	<i>Angophora costata</i> * (Smooth-barked Apple)	mature	7.0	7.0	0.25	0.28	dominant	normal	good	long (40yrs+)	high	moderate	Locally occurring species indicative of original vegetation to the area - therefore ecological significance. Located on neighbouring property to west at No. 66 Powderworks Rd.	3.0	1.9	retain	Driveway works located in TPZ of tree.
10	<i>Angophora costata</i> * (Smooth-barked Apple)	mature	9.0	4.0 canopy bias to S)	0.30	0.35	suppressed	low	poor	medium (15-40yrs)	high	moderate	Located on the council verge at the front of the site. Poorly formed tree due to pruning for clearance to overhead electrical wires. Limited crown volume.	3.6	2.1	remove	Driveway crossover works located in SRZ of tree - recommend removal.
11	<i>Camellia sasanqua</i> (Camellia)	mature	4	3	multiple trunks	multiple trunks	dominant	normal	good	medium (15-40yrs)	very low	low	Less than the prescribed size - therefore exempt. Typical representation for the species.	2.00	1.4	remove (exempt)	

* Those trees located on adjoining land (also shaded)
