Further submission in respect to the above DA .

Now that the site poles have been erected we can see the extent of the Impact of this development .

Views :The loss of views from the interior of our home is severe .

The majority of our easterly ocean view will disappear.

Set backs : The proposed development is not set back on Gardere Avenue as all the rest of the homes in this street . If you look at 74 Carrington Avenue their home is set back on the southern side which affords adjoining homes in Gardere views of the beach.

Our home is set back to comply with council requirements precisely to afford views to our neighbours to our west ...this development commences some meters north of our balcony thereby taking views .

We will be faced with looking at a brick wall immediately to the east .

We acknowledge the building site is difficult however as our town planner commented there is a much more sympathetic building plan available which would not so drastically and unfairly take our views .

David and Anne Webb
