**Subject:** da 4 park ave avalon

For our quiet amenity next door a time frame needs to be announced. This is a source of frustration. Please let me know how long until the project is finished.

During covid circumstances require that I stay home, this is another source of frustration.

But more importantly what guarantee is there that our big Angaphera tree which belongs to 2 Park Ave will not destabilise and fall as a result of or during digging of 4 Park Ave underground levels

Nobody knows what is under the ground and destabilising that tree with digging around its roots will destabilise it. Please don't.

It will cause cracking here. Movement of soil will destabilise the whole area.
