### Detailed Assessment

#### **D1 Landscaped Open Space and Bushland Setting**

##### Description of non-compliance

The proposed landscaped area of 38.2% is technically non-compliant with the 40% requirement.

##### Merit consideration

With regard to the consideration for a variation, the development is considered against the underlying Objectives of the Control as follows:

- *To enable planting to maintain and enhance the streetscape.*

##### Comment:

The resultant development will continue to allow for the sufficient landscaping within the front yard to maintain and enhance the Calool Crescent streetscape.

- *To conserve and enhance indigenous vegetation, topographical features and habitat for wildlife.*

##### Comment:

The proposed development does not seek the removal of any indigenous vegetation, topographical features and habitat for wildlife.

- *To provide for landscaped open space with dimensions that are sufficient to enable the establishment of low lying shrubs, medium high shrubs and canopy trees of a size and density to mitigate the height, bulk and scale of the building.*

Comment:

The proposed development indicates that planters are to be provided forward of this dwelling house. In addition, the landscaped area within the front yard remains largely unchanged and sufficient to enable the establishment of low lying shrubs, medium high shrubs and canopy trees of a size and density to mitigate the height, bulk and scale of the building.

- *To enhance privacy between buildings.*

Comment:

Consideration has been given that the provision of additional screen plantings would not be necessary to further enhance privacy between buildings.

- *To accommodate appropriate outdoor recreational opportunities that meet the needs of the occupants.*

Comment:

The occupants of the subject site will retain appropriate areas for outdoor recreation, in particular within the rear yard where the swimming pool is currently located.

- *To provide space for service functions, including clothes drying.*

Comment:

The proposed development will continue to sufficient space for service functions such as clothes drying.

- *To facilitate water management, including on-site detention and infiltration of stormwater.*

Comment:

The proposal does not result in a significant increase in impervious areas and is considered to provide for acceptable stormwater management subject to conditions.

Based on the above, the proposed development is considered to meet the objectives of this clause and is supported on merit.

## **THREATENED SPECIES, POPULATIONS OR ECOLOGICAL COMMUNITIES**

The proposal will not significantly affect threatened species, populations or ecological communities, or their habitats.

## **CRIME PREVENTION THROUGH ENVIRONMENTAL DESIGN**

The proposal is consistent with the principles of Crime Prevention Through Environmental Design.

## **POLICY CONTROLS**

### **Northern Beaches Section 7.12 Contributions Plan 2019**

The proposal is subject to the application of Northern Beaches Section 7.12 Contributions Plan 2019.

A monetary contribution of \$ 600 is required for the provision of new and augmented public infrastructure. The contribution is calculated as 0.5% of the total development cost of \$ 120,000.
