**RE: DA2020/1723 - 48 Johnson Street FRESHWATER NSW 2096**

We are concerned about morning shadowing to our outdoor living space and garden due to the proposed design and height of the roof.

Currently we enjoy a good amount of sunlight in both the front and back gardens, which we access all year round and which we find greatly beneficial to our health.

We would be happy to discuss this with the assessing planner in further detail.
