

#### GENERAL NOTES

GENERAL NOTES
All dimensions are to be confirmed on site by the builder/subcontractor, any incongruencies must be reported to the Designer before commencement of any work.
No Survey has been made on the boundaries, all bearings, distances and areas have been taken from the contour survey plan. A Survey must be carried out to
confirm the exact boundary locations.
No construction work shall commence until a site survey confirming the site boundaries has been completed. The contractor is to ensure that the boundary
setbacks are confirmed and used, the boundary setbacks take precedence over all other dimensions. The Survey work must be performed by a registered Surveyor.
In the event of encountering any discrepancies on these drawings, specification or subsequent instructions issued, the Builder/Subcontractor shall contact the
designer before proceeding further with any work.
All construction, control joints and expansion joints in the wall, floors, other locations shall be in strict accordance with the Structural Engineering details. No joints
or breaks other than specified, are allowed without written permission from the Engineer.
Magneting the fabrication of secondary components such as, windows, doors, internal frames, structural steel components and the like, are not to be taken
from these documents. Measurements must be taken on site to suit the work as constructed.
All existing structures need to be examined for structural adequacy, and it is the Contractor's responsibility to ensure that a certificate of structural adequacy is
available prior to the start of any work.
