**RE: DA2020/1167 - 9 Francis Street DEE WHY NSW 2099**

As a Mental Health practitioner, a weekly visitor to the area, member of Master Builders Club on Fisher Rd, and a member of the New Life Baptist Church, I write to support of this application.

The intent in developing this site is to continue in the Church's very long history in building Community. The shared facilities have been designed to be inclusive and enabling places of worship, creative arts and social interaction - vital to the fabric of a well functioning and mentally resilient society.

In listening to our neighbours, this design presents beautification, sunlight, air flow and improved amenity.

The Frances St end presents as a distinctly beautiful building which enhances the neighborhood aesthetics and does not appear out of scale to surrounding buildings..

The Fisher road frontage functionally and aesthetically blends with similar Building frontages along Fisher Road and therefore creates a sense of flow for pedestrians along Fisher Road. I heartily support this application.
