Subject: FW: Support for a mobile telephone tower.

Dear Sirs,

I am a resident of the RSL ANZAC Village and reside in the area known as the "Dardanelles".
I am writing to ask for your support for RSL Lifecare's application (DA2018/1481) to construct a mobile telephone tower within the village.

As a resident, 87 years of age and a former servicewoman (WRAAF) and a war widow.
My late husband served in Korea and Malaya with the RAAF.
I hear politicians say Quote" We honour your service " and "If there is anything we can do to help, please ask ".Unquote.
I need help.
I have no family in Sydney.
My children and adult grandchildren live interstate.

I would like you to step into my shoes so you can see my problem.

To get reception from my mobile phone I have to step outside my villa and stand on the road.
If it is raining, I have to pick up my walking stick with one hand, umbrella in the other.
Oh! Not enough hands, forget the mobile phone.
If it is evening and dark, pick up the walking stick in one hand, torch in the other.
Oh ! not enough hands, forget the mobile phone.
I really need mobile phone reception in the comfort and warmth of my residence to be able to keep in contact with my family, day and night in all weather conditions.
I should not have to stand out on the road to do this.
This is extremely important to my family and I.

I am not asking for a lot.
It is 2019 not 1919.
Please help.
Thank you
Shirley.

Mrs. Shirley McLaren
