

Petition Against St Augustine's DA2020/1514 Application with Northern Beaches Council of School to accommodate increase in student numbers.

Concerns

***School has been licensed for 1200 students since 2015.**

However in 2014 they already had 1208 students even though only permitted to have 800. In 2020 when they have applied to increase from 1200 to 1500 to allow for more numbers, they already had 1422. Breaching permitted use.

If they are now permitted to increase to 1500 this would mean at the current expansion rate they will most likely be at almost 2000 students by 2025. As shown from previous years they only apply to expand after expansion has already occurred.

In 2018 to 2019 when they last spoke to residents about expansion of school when new buildings were built, St Augustine's school assured local residents that it had no intention of increasing student numbers above 1200....

***School grounds are not large enough for current students. This is evident by school using the public grounds at Brookvale oval for recess and lunch.**

***Drop off and pick up times. Traffic is severely congested in all streets around school, with parents parking in NO STOPPING zones NO PARKING and so forth with students Crossing streets in un designated areas. This causes concern for motorists with students all over the streets. UNSAFE.**

***Plans show new spots to be marked within school grounds to cater for parking needs. School has always had parking marked in playground, however do not get used (would you park your car near teenage boys while they are playing??)**

***School parking currently is severely insufficient as streets are always congested with students and teachers parking in the local area. This is unfair on residents as the school are not catering for their own needs.**

***New plans speak nothing of the school bus congestion that has been occurring in the last 2 years. A proper bus pull off zone is required for current student numbers. Reason is we now have multiple bendy buses and buses always blocking streets trying to come and leave the school. This needs addressed.**

***Parking spaces in streets that school has counted in there application is incorrect as some that have been accounted for, are private parking for the kilns units. Why are we counted parking spots on streets and allocating these to school. Again school should be catering for their own needs.**

Below are signatures of residents with same concerns.
