RE: DA2018/1924 - Forest Way FRENCHS FOREST NSW 2086

Dear Officer,

As a local resident, I'm very concerned that the development will increase the traffic along other back streets such as Altona Avenue, Deakin Street, Bentley Avenue and Brown Street. At the moment, due to the frequent traffic jam on Warringah Road, many cars choose the back streets (as mentioned above) to access Forest Way especially during peak hours. It already causes a significant increase in cars travelling along these local streets (on both directions). It threatens the local residents and children's safety. Our kids need to walk to school every morning and the traffic already makes them feel afraid. Now we could already anticipate that it would become worse after the new development to Forestway Shopping Centre. Therefore, I don't agree this development plan unless there's a traffic modelling or solution in place to solve the increase of traffic on surrounding local streets.

Thanks.
