Subject: Deveopment

Today I have conversed with one person about a Sepp 55 being constructed on Central Ave, Avalon, and now read about another in North Avalon Rd (DA2019/1260) Multiple trees being removed, underground car parks in flood areas, huge developments that shadow neighbours, and no responsibility towards sustainable building/living, or passive energy construction.

When will this council start to act smart on development, instead of just bowing to the dollar sign?
