**Re: Waste removal from 20 Albert Street, Freshwater**

As an environmentally conscious company, Cheapest Load of Rubbish endeavour to recycle at least 80% of waste products removed from building / construction sites.

Waste from the above address will be removed/recycled according to the following outline:-

- Concrete / brick / tiles / rubble is taken to our depot at St Peters and sorted and cleaned then recycled through Bingo Group / Banksmeadow Recycling
- Soil products are sorted at our depot then taken to Bingo Group / Banksmeadow Recycling where it is cleaned and certified for recycling
- Metal is taken to our depot and placed in our metal bin which is picked up daily by or dropped off to Sims Metal / Sell & Parker
- Cardboard/paper and plastic is taken to and sorted at our depot and delivered daily to Visy Recycling
- Timber – we have a market for re-usable timber. Useable timber is stored at our depot and then distributed, as required, for re-use or taken to Bingo Group / Veolia / Waste 360 for recycling
- Any waste that is unable to be recycled is disposed of at the appropriate waste transfer stations and these facilities also recycle

For any further information regarding the above please contact us on 02 9550 1181.

Regards

Jayne Younan
