RE: DA2019/1260 - 29 North Avalon Road AVALON BEACH NSW 2107

Hello.

I am urging you to reject and fight this abhorrent proposal to destroy and disfigure the land and living species at 27-29 north Avalon road, further deteriorating our country, biodiversity, lives and community. This proposal and the developer parasite behind it is a fowl outrage, creating the greatest profit per square meter at an enormous loss and worsening invasion of selfishness and natural heritage destruction in the Northern Beaches and especially Pittwater and beyond the bends past Avalon. I love my home and I love my community and literally could not get any luckier, I live amongst a beautiful spotted gum-angophora dominated remnant forest home to true locals (the wildlife) whom are literally clinging to life as corruption and greed invades and degrades with sharp metal teeth. If we continue to allow the living landscape and community to be replaced with expressions of human selfishness, ego and greed there will be no Avalon, no community and no wildlife left. There is nothing special about an area pumped full of humans and concrete, it is heartbreaking that an area once home to the largest koala population in Sydney before their extinction is continuing to allow further destruction of native habitat and ensuring the continued decline and local extinction of the remaining species (some have already been affected). The beauty and interconnectivity of this community owes an enormous debt to the incredible place we live, which literally continues to be destroyed, despite we've never known better and needed to act like it more than now. The plans for 27-29 north avalon road is a disgusting display of profiteering and environmental vandalism, destroying thousands of years worth of cumulative growth of habitat... beyond even the house boundaries for the literal 'numbers on a screen fortune' of some rich melbourne developer parasite!
