Purpose of the Waste Management Plan

This *Waste Management Plan (WMP)* will detail the arrangements for waste management during all stages of development and occupation.

The WMP must be completed in accordance with the Waste Management Guidelines (Guidelines).

A completed WMP is a mandatory requirement for any Development Application (DA) for which Council is the Consent Authority. DAs that are submitted without a completed WMP will be rejected or refused by Council.

Structure of the Waste Management Plan

All applicants are required to complete the 'Applicant and Project Details' part of the WMP and include it with the relevant Sections that apply to their proposed development.

The WMP is divided into Sections and applicants are only required to complete the relevant Sections in accordance with the Guidelines. The table below identifies which Sections are relevant to which development types.

For example, if the proposed development was to include demolition of an existing structure and construction of a single dwelling, the relevant Sections would be Sections 1, 2 and 3.

Section	Development Type [^]
Section 1 – Demolition	All
Section 2 – Construction	All
Section 3 – On-going waste management for one or two dwellings	One or two dwelling developments Mixed-use developments containing one or two dwellings
Section 4 – On-going waste management for three or more dwellings	Three or more dwelling developments Mixed-use developments containing three or more dwellings
Section 5 – On-going waste management for non-residential and mixed use developments	Commercial developments Industrial developments Mixed-use developments
Section 6 – Private roadway developments	Private roadways

[^]Note: the definitions of the development types are provided in Section vi of the Introduction to the Guidelines

A bin is placed in a designated place on site during construction to store rubbish and is removed periodically throughout the construction program.

On completion, rubbish is removed by the contractor from site.

As our materials are pre-fabricated and pre-calculated, a minimal waste is built up during construction.

Contractors are encouraged to store waste in correct position to ensure a safe working site.

As Council provides bins on completion for occupants, the property owners are encouraged to use them correctly in accordance with Council's Policy.

On-going Management Stage 2

A bin is placed in a designated place on site during construction to store rubbish and is removed periodically throughout the construction program.

On completion, rubbish is removed by the contractor from site.

As our materials are pre-fabricated and pre-calculated, a minimal waste is built up during construction.

Contractors are encouraged to store waste in correct position to ensure a safe working site.

As Council provides bins on completion for occupants, the property owners are encouraged to use them correctly in accordance with Council's Policy.
