RE: DA2020/0034 - 11 Moore Street CLONTARF NSW 2093

My concerns with this DA2020/0034 is the loss of pre existing view lines we have from our home @ 10 Moore Street. From what I can see the heights on plans appear to exceed maximum heights from lowest point of their property.

I also have concerns the A frame style roof build they are intending, is not the best way to preserve neighbours view lines. I flat roof line would help all.

As per their previous DA, Planner Catriona Shirley suggested they needed to place precise height poles across this property so we could accurately assess the impact on views. I would like to see these height poles please.

Many thanks
Glenn Johnstone.
