Hi

It's a lovely idea to support working parents (I'm one of them with two little children), but this is absolutely shocking location for a childcare facility.

Out street is already really narrow and I'm struggling every morning driving there. The spot where they want to open a childcare is really narrow and busy. There's already a bus stop, really busy round about directing traffic to worrobil and serpentine (both really congested), there's already a lot of traffic around the primary school. Now add the lovely new tunnel being built and it will be a disaster, we will have even more traffic going through bangaroo street.

I'm really concerned about the safety of pedestrians, especially children, and other drivers.

There's absolutely no spare parking on Bangaroo Street and I don't appreciate any extra parents or care gives parking in surrounding streets, such as ours.
There are busses driving around too.

I believe approving such a project would make the whole area much more dangerous (driving and parking) and would devalue all properties surrounding the facility.
