Subject: Submission no 2019/0229.. 18/99 Alfred st Narraweena

Attention Nick England Reece Gardiner
10/99 Alfred st
Narraweena

Nick , meant to put this in my emails yesterday concerning noise from cafe. Currently we are woken every morning at 5:30 am with the knock knock knock of the coffee machine when the coffee grounds are banged out of the hand held device this continues all day and can heard 3 levels below in the carpark, it really travels that much through the building .

Maybe there could be some type of sound proofing of this device such as a rubber damper for example. Thanks for your time.
