RE: DA2020/1167 - 9 Francis Street DEE WHY NSW 2099

Elevated walkway between buildings and rooftop conference area will remove any privacy in our lounge room and bedrooms on north side of our building as will have everyone looking directly down into our property. To have up to hundreds of people a day been able to look directly down into property above fence line will cause a massive decrease in the value of our property and deserved privacy.

The elevated food bridge between buildings should be removed to keep foot traffic between church and conference centre at ground level to minimise loss of privacy and allow us to at least leave curtains open.

I would also like to see privacy screens used on rooftop conference room to reduce people looking directly into our bedrooms and backyard.
