RE: DA2020/1285 - 44 Greycliffe Street QUEENSCLIFF NSW 2096

Drawing DA26 shows proposed swimming pool being 2/3 supported in existing rock and 1/3, 1.5m, projecting out, totally unsupported. The pool contains 5m x 2m x 1.5m, ie 15 cu.m, of water, ie 15 tonnes. Can the pool support this? Should it not be fully supported? If the pool collapses, this tsunami will flood into 46, my property, which is lower than 44. As will any pool overspill. Can any 44/46 dividing walls inhibit/prevent water ingress from 44, and maintain 46 privacy?
