RE: DA2023/0511 - 337 Lower Plateau Road BILGOLA PLATEAU NSW 2107

I am concerned at the amount of tree loss, and the ability for council to manage ensuring compliance of a) all high value local native species to be retained and protected, b) replacement plants to assist in generational tree and habitat recovery and c) fauna protection. Currently I cannot see any report on fauna and habitat and as there are so many trees proposed to be felled, I request that council please request a fauna report PRIOR to any works carried out. It simply won't be possible for an arborist to manage this during removal works. Even though many plants are non-native non high value, the animal kingdom utilises many species listed in the arborist's very thorough report.
