RE: DA2021/1164 - 521 Barrenjoey Road BILGOLA BEACH NSW 2107

I believe this should not go ahead purely for the massive chaotic disruption it will cause to traffic in and out of the beaches.

We already suffer from big congestion around the bends during the day especially at peak hours with lots of trade traffic and city workers heading out and in. This development will only cause huge delays and frustration for the locals.

I really don't think there should be any houses built on that stretch of road one for the local flora and fauna and to keep the headland looking natural and also from a safety point of view building a driveway right into where cars line up for the roundabout on a blind bend is just asking for an accident.

Not to mention there is barely any room on surrounding streets for parking as it is let alone with 20 Utes and trucks ramming in every day.

Do what's best for the greater community and reconsider this proposal.
