Subject: I object strongly to this DA2020/0661 Telco tower in Park

26 August 2020.

d\s\b160\plainStephen Brickwood
d\s\b160\plain25 Blackwood Road,
d\s\b160\plainNorth Curl Curl, NSW. 2099

d\s\b160\plainDear Council.

d\s\b160\plainin addition to my previous submission.

d\s\b160\plainI object strongly to this DA2020/0661

d\s\b160\plainRe: Report - Visual Impact Assessment Report

d\s\b160\plainThis report limits itself to one installation and ignores all the other co locating telcos.

d\s\b160\plainThe council has no control over the co locators to follow, it has no legal rights if one telco builds.

d\s\b160\plainTherefore, the council cannot approve even one telco.

d\s\b160\plainThe community objected strongly when the simple light towers were built and, to add insult to injury, without due process.

d\s\b160\plainThe other telcos, are a fact of life and, would have an absolute legal right to this tower and the installations of their own BASE STATIONS with their own razor wire compounds. The council would have no control.

d\s\b160\plainThe foot print of all these additional compounds will be huge.

d\s\b160\plainThe height of the tower will increase with each telcos new antennas.

d\s\b160\plainThis report fails to show the real world impact of this 'gross' proposed DA.

d\s\b160\plainThis report is deceptive in this larger matter.

d\s\b160\plainThis report fails to show the real world impact on the community of this proposal when they are in the park enjoying its environment and playing on the fields or walking or picnicking or etc..... and new by or within 100s of meters of this proposal.

d\s\b160\plainThis report is to assist the council and is the product of a professional expert, and yet the full impact has not been provided.
