RE: DA2017/1294 - 9 Lawrence Street FRESHWATER NSW 2096

I'm writing to you to voice my concerns about the proposed development in Freshwater. Freshwater is already struggling to cope with the developments that have gone on, the streets are packed, the school is overflowing, the beach is carnage, the bins on weekends at the beaches and parks are full, there just is not enough space for any more development to go on. We are losing the village feel which is why so many of us love Freshwater. We don't want to be the next Dee Why, if we did, we would have moved there not Freshwater. There is also so much evidence to say that living in such close proximity to substations is detrimental to your health so why would the council want to put peoples lives at risk by letting this development go ahead?

I am not in support of this and will be a very unhappy rate paying resident (I own 2 properties) if this goes ahead.

Kind regards,
Catherine
