RE: DA2017/1274 - 52 Cabbage Tree Road BAYVIEW NSW 2104

Please protect this vital wildlife corridor. Sydney is so busy and congested and it is the developer who walks away with the money without any consideration for the environment and in this case the species who need this habitat to survive. Why not maintain some of the nature in this area- rather than making it yet another sterile even more densely populated area like the rest of Sydney.
Thank you for your consider in this matter.
