RE: DA2018/0149 - 60 Binalong Avenue ALLAMBIE HEIGHTS NSW 2100

The only effects of the housing that i can see are negative in a low density classed R2 area such as excessive noise(which will result in a strain on the police being called out) , parking being a nightmare/over crowding streets potentially causing a road hazard and waste/electricity/water from as many as 72 people entering such a small suburban area.

I object to this proposal based on the impact to Allambie and my location.
