RE: DA2017/1274 - 52 Cabbage Tree Road BAYVIEW NSW 2104

Dear Sir ? Madam

What makes Sydney special is the preservation of wildlife corridors and National Parks to preserve endangered wildlife well into future generations.

Corridors are essential to maintain genetic diversity.

After traveling to many major cities around the world Sydney is unique and deserves to remain so. Once our wildlife is gone it is gone its gone forever. I strongly support NOT to dilute laws which act preserve our wildlife corridors in NSW especially Sydney and the Northern Beaches. I saw my first wild powerful owl close to the suburbs i the Northern Beaches. . I would be in favour of strengthening and preserving laws to preserve our wildlife corridors and to create new wildlife corridors to add to the existing ones. I would like to understand what is happening in NSW and the Northern Beaches to protect what we have and why there are proposed changes.

Best wishes
Dr Larissa Grund
