**RE: DA2017/1274 - 52 Cabbage Tree Road BAYVIEW NSW 2104**

Sydney is in urgent need of protecting the diminishing wildlife. I visited Sydney recently, and I was shocked to see hundreds of high rise units being built in many suburbs. Areas were once bushland had been bulldozed to make way for home units, and wildlife had nowhere to go. I imagine most of them would've been killed or died due to loss of habitat.

Please don't make the same mistake of the other Sydney suburbs. Bayview is a beautiful area that most Sydney folks would be envious. Bayview's wildlife corridor is the lifeline for endangered and vulnerable species. It needs to be kept and hopefully widened for further protection.

Therefore, I object to DA1274/2017 to develop seven apartment buildings in the middle of the designated high priority wildlife corridor.

Sincerely,  
Francisa Miller
