**RE: DA2017/1274 - 52 Cabbage Tree Road BAYVIEW NSW 2104**

To Whom it May Concern,

One of the most important and vital offerings that the Northern Beaches has for its residents is a balance between urban development and nature.

Extremely important wildlife corridors like the one in Bayview that is now under threat from over development and greed is not sustainable or fair and should not go ahead.

Perhaps it is an idea for politicians to start thinking about developing satellite cities rather than cannibalising the city that I grew up in and love.

Without our wildlife, our lives are impoverished and the notion of freedom of choice in terms of how and why we live in a place, completely undermined and to whose benefit?????

Yours Sincerely,  
Christine Simpson
