RE: DA2017/1274 - 52 Cabbage Tree Road BAYVIEW NSW 2104

Please don't put the planned 85 high rise apartments in the Wildlife Corridor in Bayview! Many endangered species live in the proposed site and will not survive the construction phase of building the apartments. And IF they do survive this phase , then the impact that hundreds of humans living right next to them will surely sign their death warrant.

I am sure that if you put your mind to it, that you can find a more suitable site for these apartments

without destroying an essential wildlife habitat that is irreplaceable. Once those endangered species, such as the red tailed black cockatoo, are gone ,there is no way to bring them backExtinct means NO MORE EVER AGAIN!

Do you want YOUR LEGACY to be the Death and Extinction of several critically endangered species of animals and birds? Because if you go ahead with the planned apartments in the Wildlife Corridor of Bayview , then you won't be remembered for putting apartments there , you'll only be remembered for the death and possible extinction of these endangered species.

Thanking you for taking the time to read this submission .

Sincerely,
K.Hender
