RE: DA2017/1274 - 52 Cabbage Tree Road BAYVIEW NSW 2104

Please stop all development in this biodiversity corridor.

The development as proposed is the kind which is making koalas become vulnerable and an endangered species.

This kind of development which impacts upon biodiversity and increasingly shrinking natural habitat for many Australian native species is UNSUSTAINABLE, and should be stopped at all costs.

Profit does not turn back extinction, and the diversity of Australia's native wildlife is the more sustainable wealth which must be preserved.
