Subject: re DA 2017/1274

Dear Sir/Madam,

I understand that there has been a lot of conjecture about this development in Bayview. The bottom line is we are an aging population and we need additional low impact seniors living of a very high standard which this truly represents. Additionally we are an active, fitness conscious population on the northern beaches and pride ourselves in extending our mobility by sporting activities, such as golf, that go a long way to achieving this.

I believe this to be a great development combining these two important factors of additional accommodation and sporting activity and the way it has been planned will be of little impact on the surrounding bushland, fauna and vista.

I also believe the future inhabitants of the development, the golf club members and the local community will benefit well from this venture and you as a council will also substantially benefit by supporting your local voters by being progressive in your forward thinking and planning to approve this DA.

Yours sincerely,

Brett Marsden
12 The Circle,
Bilgola.
