**RE: DA2017/1274 - 52 Cabbage Tree Road BAYVIEW NSW 2104**

I strongly object to the proposed plan to damage, or undoubtedly destroy, the wildlife corridor, especially since it runs contrary to the recommendation of the experts, and against the wishes of my entire family, who frequently visit my sister who lives in Palm Beach. During my lifetime I have watched the gradual destruction of French's Forest, and so much of the natural heritage of this formerly wonderful Council area. It is clear that once there is an exception, that's the end of it., and "tough luck, residents! tough luck animals and trees! - whatever stands in the way of selfish 'progress'! This Council has the responsibility of maintaining the delight of residents living in this currently gorgeous environment - and all those who visit - and the abundant animal and plant life that used to abound here. Don't destroy this place; save it, and be thanked not only by the ratepayers, children, sightseers and swimmers but by the animals that have no voice in Council, but would experience the worst impact of all!
