RE: DA2017/1274 - 52 Cabbage Tree Road BAYVIEW NSW 2104

Dear Planning Officer,

Given this is an essential corridor to a vast number of local species of animals, I feel that the Government on all fronts is letting down the community by not providing adequate and vital space required for the movement, let alone the viability of the future for these native species.

Add to this 'Liveability' for the residents expected to live in this area. What happens to green spaces for this community in the near future if adequate planning is not upheld now. We are not just talking about a small stripe of native vegetation.

I'm hoping big developer dollars doesn't continue to win the battle over long-term viability on all fronts for the wider community, which also includes someone being the voice of the natural landscape.

Please show some respect to the modern world that we need to maintain for our well being & a future for our children as they grow.

Kind regards,
