**RE: DA2020/0661 - 7356 / 1167221 Huston Parade NORTH CURL CURL NSW
2099**

This telecommunications tower is proposed in the areas where there are numerous playgrounds for children and there are many children playing there very frequently. Whilst there is no conclusive evidence that the telecommunication radiation has adverse impact on humans, it is well known that children's brains are very sensitive and therefore a prolonged exposure to the radiation should be avoided. This will not be possible if the tower is installed at the proposed location.
