RE: DA2020/0661

I strongly oppose the latest development application by OPTUS to erect a mobile tower and infrastructure in John Fisher Park.

Parks and reserves are not appropriate places for these towers especially in this park where the community has worked so hard to rehabilitate and beautify the area. This is also Crown Land and not suitable for such commercial infrastructure.

This proposal is completely contrary to the Park's Plan of Management and compromises the ecological value of the riparian zone and the lagoon.

The reasons for the rejection of the last DA in 2017 are still equally valid.

Why is such a development on a much loved and cared for community space even being considered again ?
