RE: DA2017/1274 - 52 Cabbage Tree Road BAYVIEW NSW 2104

What is the matter with Australia and the environment?
Even China has woken up to the need to conserve our environment and our birds.
They have stopped development and are even pulling down development in
migratory paths where birds stop to rest and feed. Surely if China can protect wildlife
Australia can too. Wake up guys before it's too late.1EXU33
