**RE: DA2020/0661 - 7356 / 1167221 Huston Parade NORTH CURL CURL NSW
2099**

My family and I use the curl curl lagoon area on a daily basis and this proposal angers me both in the fact that it is misleading in the actual location of the telecommunications facility and in that the potential damaging effects caused by the constant EMF. My daughter attends curl curl north public school and would therefore place the device in less than the 500m radius that the dept. of education allow. EMF can has serious effects on developing brains, not only for my eldest at school but also the entire local community. Find somewhere else and don't be misleading about the location.
