RE: DA2017/1274 - 52 Cabbage Tree Road BAYVIEW NSW 2104

Dear Northern Beaches Council,

The role of a council is to ensure a balance and maintain a high standard of living for ALL within your boundaries. Not profit at all cost.
No-one wants to live in a concrete jungle, and this vast development ensures this. The health of the locality depends upon the conservation of these high priority wildlife corridors. Progressive countries lead the way in the realisation and implementation of these and others are watching closely and following suit. The positive impact of these wildlife corridors are undeniable and that is why this land was placed under protection to preserve it.
They need to be a standard, non negotiable feature within all land and cityscapes.

Altering this amounts to nothing more than an act of corruption- a council succumbing to the greed of a developer and the potential revenue it brings, A council out of alignment and touch with the educated views of todays world, eroding the attributes that make us the "lucky country".

This wildlife corridor is designated high priority - and non negotiable. Any suggestion to alter this is wrong, unthinkable and a failure of management.

No-one wants to live in a concrete jungle, least of all our native wildlife. It's our responsibility to ensure that doesn't happen.

Respectfully,

Suzy.

We object to DA1274/2017 to develop 7 apartment buildings in the middle of the designated high priority wildlife corridor home to many vulnerable species. This is Biodiversity land and should not be destroyed by this development."
